

**How do you think removing that  
invasive species may impact the  
other species in the area?**

**How do you think your invasive species  
arrived in your survey area?**

**If you removed your invasive species,  
how would you plan on keeping more  
from getting introduced?**

**Who in the community might help you  
remove this invasive species?**

**Does your invasive species look like any native species? How can you tell the two apart?**

**If you had to tell people one way to prevent the spread of your invasive species, what would you tell them to do?**

**If your invasive species is too widespread to be fully removed, do you still think it's worth trying to control?**

**What is one interesting thing you learned or you want to learn about your invasive species that was not included in your presentation?**
