

Rubric Score Sheet

Your job is to score your peers' invasive species management plans. They are trying to convince you that their invasive species is the biggest threat to your community and needs to be removed. Score each presentation based on the criteria below to decide which project you would support. Projects should be creative, convincing, and likely to succeed.

For each criteria, score groups on a scale of 0 (lowest) to 10 (highest). Here is a good way to think about the scores:

0: Item not included in presentation

5: Ok, but could use more details

10: Excellent, no additional information needed

After each presentation, tally up the group's score and write it in its "Total" row. The highest possible score is 100 points.

Group Number Criteria	Group #	Group #	Group #	Group #	Group #
Species Name (Common and Scientific)					
Species Description					
Species Origin					
How Species Arrived in the United States					
Species Presence in Washington					
Species Presence in Community					
Why We Should Focus on this Invasive Species					
Management Plan					
Potential Challenge and Solution
